EU Type Examination Certificate

No. CE 708913

Technical Specification:

Harmonized European Standard: EN 149:2001+A1:2009.

Product Description:

The particulate respirators are 'cup style' products designed to protect against solid particles. The letter V in the model identification indicates the model incorporates an exhalation valve.

All models are single shift devices, denoted by the classification symbol NR, and some meet the clogging option requirement of EN 149, denoted by the classification symbol D, see EN 149 Classification Table.

The DOUBLEAIR D/VD, DOUBLEAIR VC/D, PRIME-FIT/V and PRIME-FIT VC, ranges make use of the same filter media, and the same design of nose clip and head straps. The DOUBLEAIR VC/D, and PRIME-FIT VC ranges include a carbon layer in the filtering media. Models with the V suffix have the same design of exhalation valve.

The masks are held in place by a pair of elasticated head straps. All ranges are classified as both FFP1 and FFP2.

The PRIME-FIT V and DOUBLEAIR V D models make use of the same filter media and the same design of nose clip and head straps. The V suffix indicates the model includes an exhalation valve of the same design. The masks are held in place by a pair of elasticated head straps with 'pull-through' adjusters.
